

BUSINESS PROCESS OUTSOURCING IN THAILAND

Companies of all sizes need to focus on core activities. Non-core activities are still important, but they need to be performed in a leaner and more sustainable manner than most companies are capable of doing.

Our 5 Key Business Process Outsourcing Solutions:

-  1. End-to-End Payroll Outsourcing and Compliance
-  2. Full-Suite Accounting Outsourcing and Compliance
-  3. Ad-Hoc Accounting (Clean-up, Preparation for an IPO, Post-Audit Remediation)
-  4. Administrative Outsourcing (Cash Collection, Claims Processing, Vehicle Registration, etc.)
-  5. Staff Augmentation (Secondment of Key Staff)

At Grant Thornton, your non-core activities are our core business.

What sets us up apart?

Localised Solutions

Where local requirements hinder consolidating services, we provide tailored solutions by leveraging our vast network of local resources and expertise.

Global Coverage

The combination of local and regional delivery centres enables us to provide our customers with a truly global service delivery capability.

People-Centric Flexibility

We can offer different models to suit specific situations, including taking over teams from our clients, or delivering the service from the client's premises.

Commitment to Innovation

Continuously innovating our service delivery, by means of Robotic Process Automation (RPA) or Artificial Intelligence (AI), enables us to be a strategic partner to our clients.

Platform Flexibility

We provide our clients with the flexibility to either stay on their current ERP platform and/or use ours, which enables fragmented organisations to gain access to the latest technology at no upfront capital outlay.

Defined Service Standards

We deliver against shared and measurable service and operating level agreements, under a governance model adapted to our client's corporate culture and strategic objectives.

End-to-End Process Management

Our local presence and breadth of expertise give our customers the flexibility to source end-to-end processes from us whenever needed.

Monitoring and Quality Control

We create shared and measurable goals with your team using a data-driven control of the processes to detect improvement opportunities.

Single Point of Contact

We provide a single point of contact for outsourcing clients, increasing the effectiveness of the controls and enabling a more responsive & adapted service.
